

SAKSHAM KOTIA

Full-Stack & Cross-Platform Developer · Applied AI/CV · React · Flutter · Secure SaaS Systems

Ghaziabad, NCR, India | +91 8800409904 | ✉ kotiasaksham@gmail.com | [in linkedin.com](https://www.linkedin.com/in/sakshamkotia) | github.com/Saksham-kotia | [Portfolio-Saksham](#)

PROFESSIONAL SUMMARY

Full-stack and cross-platform developer (Batch 2027) with production experience across React, TypeScript, Node.js, Flutter, and Python - spanning applied computer vision, secure real-time architectures (row-level security, HMAC-signed payment verification), and full-stack SaaS platforms with admin dashboards. Comfortable owning a feature end-to-end across 7+ independently delivered, production-shipped projects.

TECHNICAL SKILLS

Languages: Python, C++, C, JavaScript, Dart 3, TypeScript, Bash/Shell

AI / Computer Vision: OpenCV, custom facial-landmark & classification models, applied ML pipelines

Web Frontend: React 19, Next.js, Tailwind CSS, HTML5, CSS3, Vite, Framer Motion, Responsive Design

Mobile: Flutter (Dart 3) - Provider/Riverpod, ChangeNotifier Material 3, Google Maps SDK, Geolocator; cross-platform iOS & Android

Backend, Security & Infra: Node.js, REST API design, Zod validation, Firebase/Supabase (Auth, Realtime, RLS), HMAC-SHA256 verification, PostgreSQL, Firestore, SQLite, Docker, Nginx, Git/GitHub, Vercel.

PROJECTS

VirtualTryOn - AI Eyewear Fitting System (Python · OpenCV · Custom ML · JavaScript) [[GitHub](#)]

- Built a full-stack AI application with a Python/OpenCV backend and JavaScript frontend; trained a custom face-shape classification model and computed inter-pupillary distance (IPD) to recommend eyewear frame sizes from facial geometry.
- Implemented real-time facial landmark detection with frame overlay on a live video feed, with backend, frontend, and model-training code organized into separate directories for clean inference/serving/training separation.

Detail Pals - Full-Stack Auto Detailing SaaS (v1+v2) (Next.js · React 19 · TypeScript · Supabase) [[GitHub](#)]

- v1 (Next.js): full-stack SaaS with a Supabase PostgreSQL backend - 6 tables with Row Level Security, 12+ server-side API endpoints with Zod validation, a 5-step booking wizard, a full admin CRUD dashboard, Resend transactional emails, and ISR caching for SEO.
- v2 (React 19 + TypeScript): migrated the same product to a fully typed client-side SPA - strict TypeScript interfaces across all component props and API contracts, route-based lazy loading, and Framer Motion AnimatePresence transitions.

Nirbhaya AI - Women's Safety Navigation Platform (React 19 · TypeScript · Supabase · Mapbox · Gemini API) [[GitHub](#)]

- Built for IEEE SHE Aspire (SafeSphere Track): a deterministic, fully explainable Women Safety Index engine scoring routes 0–100 from severity-weighted, time-decayed community incident reports and proximity to verified police/hospitals, with Gemini-generated plain-language route explanations.
- Engineered voice-activated SOS (on-device Web Speech API, 10s cancellable countdown), silent evidence capture to a private RLS-locked storage bucket, and a no-login public tracking page secured via a dedicated Supabase Edge Function and Realtime Broadcast - deliberately avoiding weakened RLS policies.

RideNow - Real-Time Ride-Sharing Ecosystem (Flutter · Firebase · Google Maps SDK) [[GitHub](#)]

- Built a two-app real-time "handshake" system: RideNow (rider - ride booking + restaurant table reservations) and RideNow Partner (driver/restaurant dashboard), both connected to a shared Firestore backend via live document listeners with no polling.
- Engineered real-time driver navigation with the Google Directions API for road-path polylines, an 800ms GPS stabilization loop with 3-attempt retry, and 40m proximity detection to trigger "Arrived" status - plus per-partner earnings subcollections and an audit-trail log for every booking.

EDUCATION

Jaypee Institute of Information Technology, Noida 2023 – 2027 (Pursuing)

B.Tech - Computer Science & Engineering | Batch 2027 | Coursework: DSA, DBMS, Operating Systems, Computer Networks, OOP

POSITIONS OF RESPONSIBILITY

Training & Placement (TnP) Coordinator - IIIT 2025–26 – Present

- Serving as a liaison between the college and recruiting companies, coordinating campus placement drives and internship programs for the student body.

Core Committee Head → Joint Secretary - Jaypee Youth Club (JYC) 2025–27

- Led/co-led IIIT's central event management society overseeing major cultural and technical events; managed 10+ cross-functional teams, end-to-end logistics, and stakeholder liaison for events with 500+ participants.

Secretary → Advisor - National Service Scheme (NSS), Units 128, IIIT 2025–27

- Directed 60+ volunteers across university social outreach programs; now mentoring incoming NSS leadership on programme design and stakeholder engagement.
